Heated Yoga Program—Infrared Heat

Unlike traditional heating methods that heat studio air, infrared heaters safely warm the body from the inside-out, similar to the soft warmth felt on a sunny day. The result is a comfortable and therapeutic heat that increases flexibility, circulation, stamina and detoxification.

You MUST bring your own mat to all heated classes.

Please make sure you hydrate before, during, and after class!

****Flow:** This practice is a flowing sequence of postures coordinated with the breath. It can be vigorous or meditative, depending on the group practicing.

****Gentle:** Gentle yoga takes a more restorative approach and combines Iyengar with Yoga therapy to focus on anatomical precision and alignment along with breath work. This class is designed to release areas of chronic tension thereby reducing mental and physical stress for all levels of participants.

****Hot Flow Yoga:** This practice is a more vigorous flowing sequence of postures coordinated with breath. The addition of infrared heat will provide increased calorie burn, increased stamina and detoxification. Class temperature will be between 95-105 degrees.

****Hot Flow Power Yoga:** A fitness-based vinyasa practice. An offshoot of Ashtanga Yoga, it has many of the same qualities and benefits, including building internal heat, increased stamina, strength, and flexibility, as well as stress reduction.

****Warm Bodyflow:** An athletic blend of yoga, Pilates, and Tai Chi focused on building strength and flexibility. Class temperature will be between 83-93 degrees. The addition of infrared heat will increase circulation, calorie burn, and muscle elasticity.

****Warm Flow Yoga**: This practice of flowing posture sequences coordinated with breath will be set to a class temperature of 83-93 degrees. The gentle heat will allow for increased flexibility and circulation in a warm and relaxing environment.

****Warm Total Body Fusion:** Combined elements of calisthenics, yoga, and Pilates will strengthen and tone all areas of the body while increasing flexibility. Class temperature will be between 83-93 degrees. The addition of infrared heat will increase circulation, calorie burn, and elasticity.
